## COMMON MISTAKES AND HOW TO AVOID THEM

### Insufficient planning

One of the most common mistakes is rushing into a renovation without proper planning. Take the time to assess your needs, set clear goals, and create a detailed plan. Consider factors such as the layout, design, and functionality of the space.

**Avoidance tip:** Work with a professional designer or architect to create a comprehensive plan that addresses all aspects of the renovation.

### Choosing unreliable contractors

Selecting the right contractor is crucial for a successful renovation. An unreliable contractor can lead to subpar work, delays, and additional costs.
